Sir Cary Dominic A. Abejuro, LPT
Hiring Manager
Department of Information and Communications Technology (DICT) Region V
Legazpi City, Albay

SUBJECT: Application for the Position of IT Officer

Dear Sir Abejuro:

I am writing to express my interest in applying for the IT Officer position at the Department of Information and Communications Technology (DICT) Region V. I am a fourth-year Bachelor of Science in Information Technology student at STI College–Legazpi, and I am eager to begin my professional career in information technology. I would welcome the opportunity to apply the knowledge and skills I have gained through my studies while continuing to develop as an IT professional.

Through my academic training, I have developed foundational knowledge in programming using Java, C#, and Python; web development using HTML, CSS, and JavaScript; database management using SQL and MySQL; as well as computer hardware and IT troubleshooting. I have also worked on academic projects, including our capstone project, “A Web-Based Barangay Management System with OCR-Based Document Digitization and Offline Functionality for Sagpon, Daraga, Albay,” along with SmartLedger and TransEase. These projects strengthened my understanding of system requirements, database concepts, user interface design, documentation, and system testing.

In addition, I completed the Java Fundamentals course through Oracle Academy and participated in the DICT Region V NICT Month 2026 Coding Competition. These experiences encouraged me to continue improving my technical knowledge and to stay open to learning new tools and technologies. I can bring a responsible attitude, teamwork, active listening, and a willingness to learn to the position. As part of my learning in my fourth year as an IT student, I have also gained familiarity with using current artificial intelligence (AI) tools to support research, learning, and problem-solving. I understand the importance of using these tools responsibly, checking the accuracy of their outputs, and applying my own judgment when working with technology.

As a graduating IT student, I understand that I am still building my professional experience. However, I am willing to learn from experienced colleagues, follow established policies and procedures, and carry out assigned tasks carefully and responsibly. I would appreciate the opportunity to discuss how my educational background, foundational technical skills, and commitment to continuous learning could contribute to the work of DICT Region V.

Thank you for your time and consideration. I would welcome the opportunity to discuss my application further, and I look forward to hearing from you.

Respectfully yours,

Rivzky Barasona Alcera
